

PrimeFaces: Using Included JQuery

 acarlstein.com/

Posted by Alejandro G. Carlstein Ramos Mejia on November 12, 2013 November 12, 2013 PrimeFaces

PrimeFaces is already shipped with the jQuery bundled; therefore, there is no need to include the jQuery script.

However, when in a page there are no PrimeFaces components that use jQuery then jQuery will not be automatically included.

To go around this issue, you must use the following line inside the <h:head> tag:

```
<h:outputScript library="primefaces" name="jquery/jquery.js" />
```
